A UNIQUE SUMMER!

This year's summer came to its end! We were very pleased to witness the implementation of our ideas and plans and watch the Inclusion Centre being full of people again. Thanks to the above, we had a beautiful, creative and entertaining summer, while managing to take care of our health.

~Lessons~

*Greek Language*Extra Tuition*Information Science*

Greek Language for adults and children: We began the teaching of the Greek language with motivation! Our students are really interested in Greek and enjoy the learning procedure in the shade of the remarkable laurel that stands in our blossoming, colorful and fragrant garden. We love our summer "classroom"!

Extra Tuition for Gymnasium and Lyceum students: The younger students also had the opportunity to participate in math and ancient Greek, two subjects that are provided as extra tuition. Their strong will and great effort make us feel truly happy and optimistic!

In addition, we tried to help students with the September exams, since their school participation was limited due to the lockdown, and our efforts were 100% successful.

Information Science - Emerging technologies: We live in the Information Age and, therefore, computer courses are essential. Both young students and adults participate in weekly lessons that take place in the Inclusion Centre's fully equipped computer laboratory. In this way they learn how to use computers and they manage to handle the demands of everyday life.

**"I speak Greek
in the street
market,
everyday."**

PARVIZ, 33

**"Ancient Greek
and math are
really
important, the
lessons in the
Inclusion Centre
are very useful**

DILSHAD, 14

**"I can
understand
some Greek. The
lessons are
really
helpful."**

ALI, 44

Το Παλατιανό είναι αρχαιολογικός χώρος και αυτό είναι πολύ ενδιαφέρον.
 Και είχαμε μια καλή μέρα με τους φίλους μας και μπόρεσα να πάρω νέες πληροφορίες για την ιστορία της Ελλάδας.
 Ο Μαχητής είναι ένα μέρος για τη διάδοση ειδήσεων και εφημερίδων στους ανθρώπους.

~Educational visits~

*Maxitis*Palatiano*St. George's Cave in Kilkis*

Our plans were affected by the measures for the prevention of COVID-19... However, we adjusted to the situation and actualized them, while being very careful and remaining in a good mood!

Our adult students visited the journalistic group of "Maxitis Kilkis" and they were toured around both the editing and printing areas and the radio booth of Radio Maxitis FM 87.8.

Our adult students from the Greek classes and our young students from the ancient Greek classes made an educational visit to the Archaeological Site of Palatiano, Kilkis. Despite the high temperature, our students watched the tour with interest and were truly impressed by the history of Palatiano, as well as by the magnificent view!

One last visit was made by our young students from the Greek classes. They visited St. George's Cave in Kilkis, where they saw stalactites, stalagmites, stone corals and fossilized animals!

"Palatiano is an Archaeological Site and this is very interesting. We had a nice day with our friends and I could learn new information about the history of Greece. Maxitis is a place for the news dissemination and newspaper distribution to people".

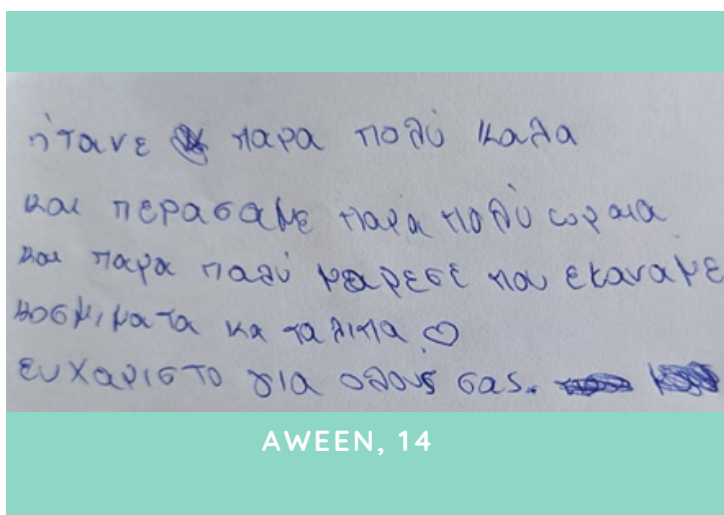

~Creative activities~

Learning*Creativity*Entertainment

Apart from lessons, kids from all ages had the opportunity to take part in creative activities, which were actualized in the Inclusion Centre! The kids listened to fairytales, made wind chimes, jewellery and fabric ornaments. Through these activities, younger and older kids came closer together, had fun and impressed us with their abilities!

"Everything was very good and we had a very nice time. I enjoyed very much the manufacture of jewellery etc. Thank you all".

Aween, 14

Meetings– Discussions

*Health education*Lessons*

Health is the most precious thing in life. This is why we considered it as important that we are all aware of ways to remain healthy and decided to organize frequent meetings with the nurses of our medical department! These meetings were held twice a week and they were concerned with “Doctor’s appointments” and “Women’s medical issues”!

At the same time, due to the fact that the new school year will soon begin, there were a lot of discussions and updates about the importance of the classes in the Inclusion Centre for both kids and adults!

All these actions would not have taken place without the valuable assistance and support from the organization **Help refugees!** We are grateful to them for their contribution to our work, which is to promote inclusion and help the people in our Centre better every aspect of their lives!
