STORIES

FINALLY, SPRING!

"If you can't find spring, you make it...!"
Motivated by this phrase of Elytis, we embellished our days, continuing our actions at every level, staying close to our people and taking care of their every need!

NEWS

REGISTRATIONS

As the registrations continue, we welcome our new members and inform them about our center's facilities! We are pleased to see the participation of our new and old members in our online courses and activities, as well as their interest for our medical, social and psychological services.

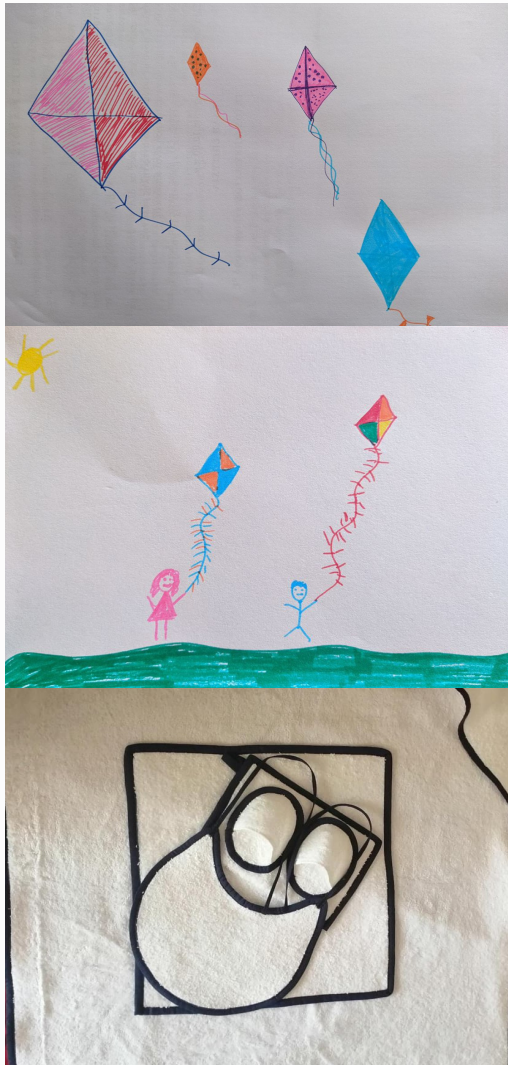

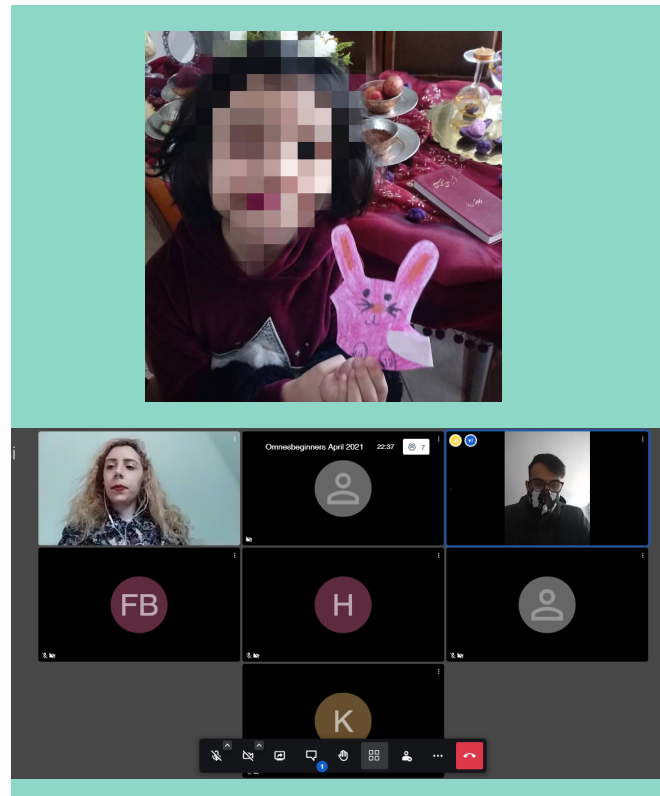

LEGAL & PSYCHOSOCIAL SUPPORT

A psychologist, a social worker and a lawyer have been included in our team, in order to contribute to the provision of comprehensive services, meet the needs of our members and enhance their quality of life! These services include supporting people who live autonomously, as well as helping vulnerable local families deal with administrative procedures. They also provide guidance and give information about social and employment inclusion, legal aid and human rights counseling.

Important for our center is the connection with the social services of the public hospital, the Municipality and the Community Center of the city, in order to facilitate the creation of a support network for the vulnerable people of the refugee and local community.

LESSONS AND ACTIVITIES

As we go through the last months of quarantine, online lessons and activities have become part of our daily routine and a way to forget our problems for a while and spend our time creatively and happily! Greek, English, remedial lessons for our young students and a variety of activities for all are carried out on a daily basis by the well-trained members of our team!

QUARANTINE STORIES

Evelina, 29 years old

Days in quarantine are difficult and boring. Shops and cafes are closed and the only thing we can do is go for a walk or go to the supermarket.

All this time, I have been keeping myself busy with housework, cooking and attending the online classes of the Inclusion Center to learn the Greek language.

My husband works fewer hours and this is why we have the opportunity to spend more time together and go for walks with a coffee in hand.

Days in quarantine can be difficult, but at least we are able to spend more time with the people we love.

All this time, I have been keeping myself busy with housework, cooking and attending the online classes of the Inclusion Center to learn the Greek language.

QUARANTINE STORIES

Azam, 35 years old

The pandemic definitely brought to us many difficulties! The long quarantine makes us and our kids tired and irritable. Before Coronavirus, we could manage to find a job and a living allowance, in order to make ends meet. Nowadays, there is nothing to do and it is really hard for us to have to live only with the government financial assistance.

However, quarantine has a positive aspect, as well, since we get to spend more time with each other, talk with our children and play games. We keep busy with educational and creative activities; we use electronic means for our children's lessons and communicate with friends through the electronic media. Coronavirus made us appreciate our health more and we thank God for every breath we are able to take, while many people are in the hospital fighting for their lives. We pray that all those people, who suffer from coronavirus, will get well soon.

All these actions would not have taken place without the valuable assistance and support from the organization **Choose love!** We are grateful to them for their contribution to our work, which is to promote inclusion and help the people in our Centre better every aspect of their lives!

We get to spend more time with each other, talk with our children and play games. We keep busy with educational and creative activities; we use electronic means for our children's lessons and communicate with friends through the electronic media. Coronavirus made us appreciate our health more...
